

ENVIROSHIELD

Revolutionize your pack-out with EnviroShield, the smart and sustainable alternative to polystyrene.

Made from recycled water bottles, EnviroShield offers the same performance as polystyrene but is lighter, uses water-based ink, and is free from any contaminants. Additionally, it's compression-tested and sealed to prevent air loss, to ensure your product remains protected throughout transit. By choosing EnviroShield, you can ensure that both your cool-chain and customers needs are met, as it offers equivalent performance to polystyrene while providing enhanced quality and sustainability.

Matches Polystyrene Performance

Made from Recycled Bottles

No Contaminants Used In Production

FDA Approved

Custom Sizing for Every Application

100% Curbside Recyclable
